

PIPELINES ARE PART OF OUR COMMUNITY

Pipeline operators work to strengthen and improve the quality of life in their communities.

Delivering the Energy We Need

Every community needs energy, from natural gas, fuel oil and propane to heat our homes, to gasoline and diesel to fuel our cars and trucks. Pipelines bring energy to our local regions.

Supporting Our Public Services

Pipelines pay property taxes just like we do. Pipeline property taxes support local schools, police and fire departments and county and city programs.

Fueling Local Jobs

So many local jobs depend on pipeline delivered energy. Commuters get to work with gasoline from pipelines. Businesses, especially local delivery and home services, need fuel for their trucks. With energy costs a big portion of small business budgets, affordable energy delivered by pipeline is essential.
