

LIQUID ENERGY PIPELINE ASSOCIATION

The Liquid Energy Pipeline Association (LEPA) represents over 50 owners and operators of pipelines delivering liquid energy and related products

LEPA members range from small operators focused on a local region to operators with multi-state systems supporting energy production, refining and carbon capture, to large midstream transmission companies operating across the nation

Representing Liquid Energy Pipelines

Safety

LEPA advocates at Congress, PHMSA and NTSB for pipeline safety policies focusing on performance, harnessing the latest technology and areas of highest risk

Energy Security

LEPA engages Congress, the Corps of Engineers, Department of Homeland Security and federal resource agencies to ensure we have a reliable pipeline system that provides access to the affordable energy America needs

Economics

LEPA advocates for responsible economic and commercial policies at FERC and in Congress. We support reasonable returns commensurate with risk and streamlined regulation appropriate for our competitive industry

Communicating the Benefits of Pipelines

ACCESS

Pipelines give us access to energy wherever we are, whenever we need

AFFORDABILITY

Pipelines can deliver the volumes of energy we need to drive prices down

OPPORTUNITY

Pipelines provide the construction, energy and raw materials for millions of good-paying jobs

SUSTAINABILITY

Pipelines are the safest, most environmentally protective way to deliver liquid energy
