

LIQUID ENERGY PIPELINES

- ✓ Liquid energy pipelines deliver fuels, feedstocks and products from where they are produced to where we need them
- ✓ Pipelines are the safest, most environmentally protective and reliable way to transport the large supplies of liquid energy we need

LIQUID ENERGY PIPELINES DELIVER:

TRANSPORTATION FUELS
gasoline, diesel and jet fuel

CLEAN ENERGY SOLUTIONS
carbon dioxide, renewable diesel
and liquified petroleum gas

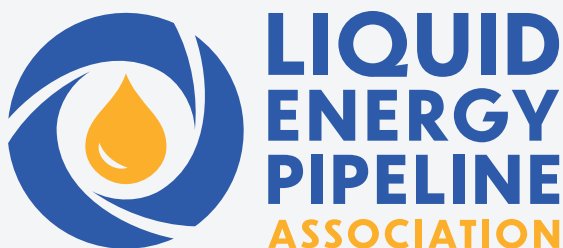

**TRANSPORTATION FUEL
FEEDSTOCKS**
crude oil

**RURAL HOME HEATING AND
AGRICULTURAL FUELS**
propane

INDUSTRIAL FEEDSTOCKS
ethane, propane and butane

The Liquid Energy Pipeline Association (LEPA)
represents over 50 owners and operators of pipelines
delivering liquid energy and related products

LEPA members range from small operators focused on a local region to operators with multi-state systems supporting energy production, refining and carbon capture, to large midstream transmission companies operating across the nation
